

Omnipotech Outsource Your IT Services

Description:

Shouldn't the company that designs, builds, and services your datacenter infrastructure be the same people you call to fix issues at your office? You need one partner from desktop to datacenter, who can manage and support it all that's OMNIPOTECH. Founded in 2001 as a Microsoft-based technologies training school, we've evolved into a complete managed service provider for more than 300 organizations, in 17 states and 13 countries. We've helped a lot of people 3,000 users overcome a lot of challenges, but the solution for each is never the same. OMNIPOTECH works with you to understand and pinpoint your unique obstacles and build an environment that's specifically tailored to you. We know relationships grow stronger over time. From simple projects to managing and maintaining all of your tech, we're here for you for the long haul. At the end of the day, you need to have confidence that your technology is going to work, and we offer you that matched with fanatical support.
